Cigarette filters
Tobacco

Universal Cigarette Manufactory offers a wide range of tobacco products: cigarettes, cigarillos, cigarettes' filters and exclusive tobacco blends produced with leading tobacco blending companies from Brazil, North America, South Africa, Middle East and Asia.

A modern automated production complex is located in Kaliningrad, Russia. The production of tobacco products, with a fully automated work cycle, was engineered taking into account the time-tested American traditions of working with tobacco.

UCM produces cigarettes with the following filters: capsule, classic monoacetate, combined double with charcoal or recessed filters, triple tube.

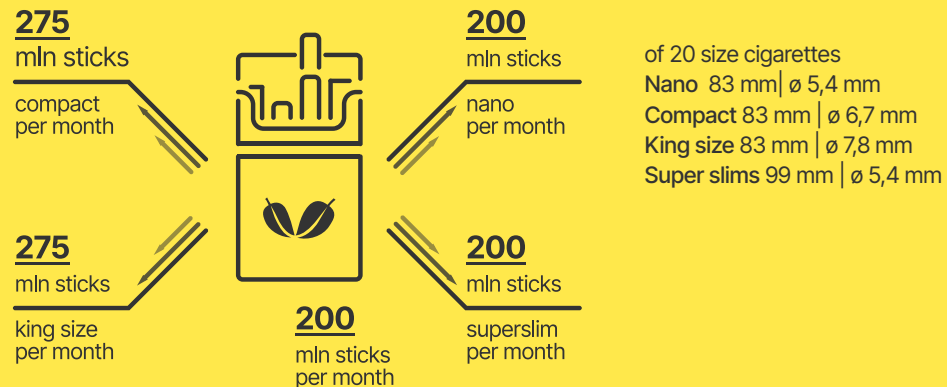

The company portfolio includes cigarettes of different price segments from low-cost to premium.

Private Label

UCM constantly develops its production capabilities and guarantees the highest quality of the offered products. Our own "quality control laboratory" allows us not only to ensure the highest control of incoming raw materials, but also to manage in real time all the basic parameters of the produced ready products.

Large assortment of tobacco and blends from the world's leading tobacco growers; own filter making machines; modern equipment and wide experience in the production of quality tobacco products allow UCM to be one of the leading companies in Russia for the production of private label products.

Cooperation options:

- "end-to-end" production of tobacco products under the customer's trademark: from the development of the cigarette's construction and selection of tobacco blends to adaptation or development of the packaging design, followed by support and quality control of the produced products.
- development of a unique product under the UCM's trademark, taking into account all the special requirements of the customer.
